

Dear Sir or Madam:

Please I urge you to reject NAB'S Petition 04-160 due to unfairness into my life, I tryed regular radio and all I got is commercials, I'm a working man, I commute quite some time and I need information as quick as posible to have my commute altered in case of an accident or jam so I could do the necesary changes to get to work on time.

Satelite radio is like the invention of the lighth bulb, we need it and I'm sure back the the candle indusrty went up in arms.  
This is the future lets get on the bus.
